Hiring Manager

Dear Hiring Manager,

I am writing to apply for the Software Engineer/Developer position within your organisation.

As a New Zealand Permanent Resident, I bring practical experience in React.js, TypeScript, JavaScript, Tailwind CSS, C#.NET, ASP.NET Core, SQL Server, REST API integration, and modern web application development. I am currently working as a Software Engineering Mentor with Tiāki Taonga Trust while actively contributing to web development projects, including the Trust Website and RIL AI Accountancy Software platform.

In my current development work, I have designed and implemented responsive, accessible, and user-focused interfaces using React.js, TypeScript, and Tailwind CSS. My responsibilities include developing reusable components, integrating REST APIs, improving application performance, ensuring WCAG 2.1 accessibility compliance, and collaborating with stakeholders to deliver scalable digital solutions.

As a Software Engineering Mentor, I guide interns through software development best practices, review technical documentation, API designs, and database schemas, and support Agile delivery processes. This role has strengthened my leadership, communication, and technical review skills while maintaining hands-on involvement in modern software development.

Previously, I worked as a Product Developer at Wrench Solutions, where I developed enterprise software applications using C#.NET, ASP.NET, and SQL Server. This experience provided a strong foundation in software development lifecycle processes, database design, testing, debugging, and system maintenance.

In addition, I bring over ten years of experience as a Computer Science Mentor and Educator, which has enhanced my ability to communicate complex technical concepts, collaborate effectively within teams, and support continuous learning and improvement.

My key strengths include:

- React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS
- C#.NET, ASP.NET Core, REST API Development
- SQL Server, PostgreSQL, Database Design, Query Optimisation
- Cloud & DevOps: AWS Fundamentals, Git, GitHub, GitLab, Agile and Scrum Methodologies
- Accessibility Standards (WCAG 2.1) and Responsive Design
- Software Engineering Mentoring and Technical Leadership

I am enthusiastic about the opportunity to contribute my technical expertise, mentoring experience, and commitment to delivering high-quality software solutions. I would welcome the opportunity to discuss how my background aligns with your organisation's goals.

Thank you for your time and consideration. I look forward to hearing from you.

Yours sincerely,

MINI M S
