Work Rights: New Zealand Permanent Resident

PROFESSIONAL SUMMARY

Software Engineer with 3 years of hands-on development experience and a decade of prior computer science teaching experience. Builds production web applications and mentors engineering interns using React.js, TypeScript, C#.NET, ASP.NET Core, and SQL Server, with a track record of translating complex requirements into accessible, maintainable solutions. Brings a rare combination of technical depth and strong communication skills from a teaching background. Seeking remote or hybrid software engineering roles.

TECHNICAL SKILLS

- Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design
- Backend: C#.NET, ASP.NET MVC, ASP.NET Core, REST APIs
- Database: SQL Server, PostgreSQL, Stored Procedures, Database Design, Query Optimisation
- Cloud & DevOps: AWS Fundamentals, Azure, Git, GitHub, GitLab, CI/CD
- Tools & Practices: Visual Studio, VS Code, Postman, Jira, Agile/Scrum, Unit Testing, Code Reviews, WCAG 2.1 Accessibility

PROFESSIONAL EXPERIENCE

Software Engineering Mentor & Web Developer — Tiaki Taonga Trust (Volunteer) Oct 2025 – Present

Projects: Trust Integrated Platform · Tiaki Taonga Trust Website · RIL AI Accountancy Software

- Lead technical design and integration of the Trust Integrated Platform, coordinating multiple portfolio modules through shared authentication, role-based access control (RBAC), REST APIs, and PostgreSQL.
- Mentor software engineering interns on React.js, TypeScript, C#.NET, ASP.NET Core, SQL Server, Git/GitHub, and Agile development; conduct architecture, code, and pull request reviews.
- Build responsive, accessible (WCAG 2.1) interfaces using React.js, TypeScript, and Tailwind CSS for the Tiaki Taonga Trust Website and RIL AI Accountancy Software, including reusable components, REST API integration, and dashboard features.
- Support cloud infrastructure, deployment, and CI/CD using AWS Lightsail, Azure, GitHub Actions, and Vercel.
- Apply AI-assisted development practices (Claude and ChatGPT) for requirements analysis, documentation, code generation, and debugging.

Career Transition — Software Development 2023 – 2025

- Self-directed transition from teaching into software engineering: intensive study in React.js, TypeScript, C#.NET, and ASP.NET Core, culminating in ISTQB CTFL certification (July 2024) and hands-on project work.

Computer Applications Mentor Jun 2012 – Apr 2023

Project: Project Life Cycle Management (PLM)

- Delivered computer science instruction in Java, C#.NET, C++, C, SQL, HTML, and Object-Oriented Programming (OOP) to secondary school students.
- Mentored final-year students in designing and building a Project Life Cycle Management system using C#.NET and SQL Server, covering requirements analysis, database design, implementation, and testing.
- Supervised student software projects, conducted code reviews, and guided debugging, SDLC best practices, and technical presentations.

Product Developer Nov 2005 – Aug 2007

Project: Engineering Procurement and Construction (EPC) – ISRO & BHEL

- Developed and maintained enterprise EPC/PLM software using C#.NET, ASP.NET, ADO.NET, and SQL Server, including stored procedures and query optimisation.
- Participated in the full SDLC — requirements, design, development, testing, and deployment — across cross-functional teams.

EDUCATION

- Master of Computer Applications (MCA)
- Bachelor of Science (Mathematics)
- Bachelor of Education (B.Ed), Computer Science

CERTIFICATIONS

- ISTQB Certified Tester Foundation Level (CTFL) – Syllabus v4.0, ASTQB/ISTQB, July 2024
- Foundational C# with Microsoft – Developer Certification, freeCodeCamp & Microsoft, August 2026
